Cuba, Havana – See it like rain falling perhaps or even night senses and follow this as the Logic of Sense

By Shomit Sirohi, Jose Revueltas and Roberto Bolano

Trailers and short images and all that also there, divine a sentence story and image-story as well.

Now We Can Follow a Logic and Cinema – it is with Cuban style

footage – which then is like a cut needed, intercutting, thesis, anti-thesis and synthesis of Eisenstein – I argue it has a lot of works in development – a lot of divining going on – Cover it with Bolano, Revueltas and Sirohi
